Ask any established business owner to identify his or her toughest challenge when just starting out, and you'll likely get this answer: raising capital. Most aspiring entrepreneurs know far too little about the sources of money that can help start a business or fuel its growth. Where do you get capital? What are investors looking for? How do you ask for money in a way that gets results? This book answers these and many other critical questions. Even more important, entrepreneur and consultant David Nour shows how to develop long-term relationships with financial partner—the people who can help keep a business humming throughout its life. The Entrepreneur's Guide to Raising Capital, designed to help entrepreneurs navigate the money-raising maze, shows how to attract financing to fund the start-up and growth phases any business moves through. It answers the most common—and the most perplexing—questions entrepreneurs have about financing a business: How do I put together a credible request for funds? How do I choose wisely from among the plethora of financial and strategic investors, consultants, investment bankers, and other intermediaries? How do I identify and avoid the risks associated with various sources of capital? How do I plan for the right kind, amount, and source of smart capital as the business evolves? How do I get the highest return on invested capital? How do I avoid the biggest mistakes entrepreneurs make when raising capital? This book provides real-life, pragmatic advice from entrepreneurs who have raised money from friends, family, angel investors, and banks, as well as institutional investors such as venture capitalists and private equity firms. It details the process from start to finish while spotlighting the danger spots and ways to avoid them. It will be especially useful to those who are uncomfortable making important financial decisions, and to those who are confused by all the conflicting opinions offered by advisors—both well meaning and otherwise. By showing readers the financing ropes, Nour removes a major source of stress for budding entrepreneurs and moves them closer to their dream come true: a successful business.

Instant Wall Street Journal Bestseller! You don't need to be Ivy League educated, have money, be creative, or even have an idea to get rich. You just need to be willing to break the rules. At nineteen, I founded a software company with \$119 in my bank account. Five years later, it was valued at \$10.5 million. I don't consider myself exceptionally brilliant. I just realized something few people know: You don't need lots of money or an original idea to get really rich. Now, I make more than \$100,000 in passive income every month, while also running my own private equity firm and hosting The Top Entrepreneurs podcast, which has more than 10 million downloads. This book will show you how I went from college dropout to member of the New Rich. And I'm holding nothing back. You'll see my tax returns, my profit and loss statements, my email negotiations when buying and selling companies. It's time to forget your grandfather's advice. I'll teach you how to be a modern opportunist--investor, entrepreneur, or side hustler--by breaking these four golden rules of the old guard: 1.Focus on one skill: Wrong. Don't cultivate one great skill to get ahead. In today's business world, success goes to the multitaskers. 2.Be unique: Wrong. The way to get rich is not by launching a new idea but by aggressively copying others and then adding your own twist. 3.Focus on one goal: Wrong. Focus instead on creating a system to produce the outcome you want, not just once, but over and over again. 4.Appeal to the masses: Wrong. The masses are broke (\$4k average net worth in America?). Let others cut a trail through the jungle so you can peacefully walk in and capitalize on their hard work. By rejecting these defunct rules and following my unconventional path, you can copy other people's ideas shamelessly, bootstrap a start-up with almost no funding, invest in small local businesses for huge payoffs, and reap all the benefits.

The main driver of inequality—returns on capital that exceed the rate of economic growth—is again threatening to generate extreme discontent and undermine democratic values. Thomas Piketty's findings in this ambitious, original, rigorous work will transform debate and set the agenda for the next generation of thought about wealth and inequality.

Teaches how best to finance a business no matter the size, including doing less with more in the early stages, growth financing, and alternatives to traditional financing.

The chief investment officers (CIOs) at endowments, foundations, family offices, pension funds, and sovereign wealth funds are the leaders in the world of finance. They marshal trillions of dollars on behalf of their institutions and influence how capital flows throughout the world. But these elite investors live outside of the public eye. Across the entire investment industry, few participants understand how these holders of the keys to the kingdom allocate their time and their capital. What's more, there is no formal training for how to do their work. So how do these influential leaders practice their craft? What skills do they require? What frameworks do they employ? How do they make investment decisions on everything from hiring managers to portfolio construction? For the first time, CAPITAL ALLOCATORS lifts the lid on this opaque corner of the investment landscape. Drawing on interviews from the first 150 episodes of the Capital Allocators podcast, Ted Seides presents the best of the knowledge, practical insights, and advice of the world's top professional investors. These insights include: - The best practices for interviewing, decision-making, negotiations, leadership, and management. - Investment frameworks across governance, strategy, process, technological innovation, and uncertainty. - The wisest and most impactful quotes from guests on the Capital Allocators podcast. Learn from the likes of the CIOs at the endowments of Princeton and Notre Dame, family offices of Michael Bloomberg and George Soros, pension funds from the State of Florida, CalSTRS, and Canadian CDPQ, sovereign wealth funds of New Zealand and Australia, and many more. CAPITAL ALLOCATORS is the essential new reference manual for current and aspiring CIOs, the money managers that work with them, and everyone allocating a pool of capital.

When the deaths of several high-level politicians are linked to a single professional killer, new president Will Lee, with the help of his CIA director wife, follows leads from a quiet D.C. suburb to an island hideaway in Maine.

Writer, consultant and speaker Chris Rabb coined the term "invisible capital" to represent the unseen forces that dramatically impact entrepreneurial viability when a good attitude, a great idea, and hard work simply aren't enough. In his book, Invisible Capital: How Unseen Forces Shape Entrepreneurial Opportunity, Rabb puts forth concrete and effective ways entrepreneurs and their advocates can build and grow sustainable enterprises amid these unseen forces created by society's uneven playing field. By honoring democratic ideals, challenging assumptions, and reframing how success is defined, Rabb illuminates the promise of commonwealth entrepreneurship. This compelling and often counter - intuitive book illustrates how broad and meaningful entrepreneurial opportunity benefits not just individual entrepreneurs, but local communities and society at large.
