Machining and CNC Technology, Third Edition, by Michael Fitzpatrick, will provide the latest approach to machine tool technology available. Students will learn basic modern integrated manufacturing, CNC systems, CAD/CAM and advanced technologies, and how to safely set up and run both CNC and manually operated machines. This is a how-to-do-it text.

This unique text presents a thorough introduction to Mastercam Mill for students with little or no prior experience. It can be used in virtually any educational setting -- from four-year engineering schools to community colleges and voc/tech schools to industrial training centers -- and will also serve as a reliable reference for on-the-job use or as a self-study manual. The award-winning authors have carefully arranged the contents in a clear and logical sequence and have used many hundreds of visuals instead of wordy explanations. An enclosed CD contains Mastercam Demo V. 9 and also includes examples and exercises from the text for student practice. Learning Mastercam Mill Step by Step is sure to become a valuable resource for anyone learning or using Mastercam Mill overwhelmingly, the leading software of its type in industry.

"CNC programmers and service technicians will find this book a very useful training and reference tool to use in a production environment. Also, it will provide the basis for exploring in great depth the extremely wide and rich field of programming tools that macros truly are."--BOOK JACKET.
